4paradigm

agenda

- Purpose of MLOps Committee
- Scope of MLOps Committee
- Any difference from existing committee
- What is the communication plan
- Any Feedback

Purpose of MLOps Committee

- We want to build one committee under LF AI & Data, named as MLOps Committee
- Initial Sponsors from TAC : ZTE and 4Paradigm
- MLOps' vision: To enable Data Engineers and System Engineers to build, test, run and update Machine Learning Application in the real world faster and easier.
- Committee's Value Statement: To help MLOps related projects to get more recognition and adoption through cooperation by a passionate community of members.

Which projects are fit for this committee

Open Source Projects can be used in Machine Learning Engineering, not algorithm.
it should be framework neutral, hardware neutral, cloud neutral.

Projects that we will consider to include:

1. Feature Engineering related (Feast, OpenMLDB, etc)
2. Data and Model Version related (DVC, etc)
3. Training and Serving related (Adlik, horovod, etc)
4. Model monitoring related (...)

Projects that we will not include:

1. AI Framework including tensorflow, pytorch, paddlepaddle, mindspore, etc
2. Focused in one specific area as NLP, OCR, etc
3. Data license related
4. Specific hardware related

The initial Projects

FEAST

Feast ★ 3,076
LF AI & Data Foundation

ADLIK

Adlik ★ 525
LF AI & Data Foundation

OpenMLDB

We will include more projects later.

What is the difference between CDF MLOps sig

There is a MLOps Sig in Continuous Delivery foundation which has Jenkins, Jenkins X, tekton, spinnaker projects.

- Their scope is to extending DevOps principles to the area of Machine Learning
- Their concerns are
 - CI/CD tools across DevOps and MLOps scenarios
 - Pipeline management
 - Common testing aspect such as code coverage, code quality, license tracking, CVE checking etc

Conclusion: Their sig is more focused on CI/CD tools and pipeline in MLOps, but quite different than us. we can have close cooperation with their sig, since we also need CI/CD tools.

What is the difference from ML workflow committee

- MLOps committee focus on MLOps related projects.
- ML workflow and interop committee is more related on different AI framework interoperation and data license.
- They are quite different.

What is the difference from DataOps Committee

- Purpose different:
 - “DataOps is a set of tools and principles to support delivery of trusted, high-quality data. “
 - MLOps cares not only data, but also model.
- Focus different:
 - DataOps can be used in Machine learning and Data analytics.
 - MLOps is focused in Machine learning.
- Project in scope different:
 - DataOps include Egeria, Fybrik, OpenLineage, Datashim
 - MLOps include Feast, adlik, openml db

Other benefits for LF AI & Data

- Enhance the branding of LF AI & Data in MLOps area
- Attract more projects MLOps related into LF AI & Data

What is the communication plan ?

- Have one online meeting once a month, 4Paradigm can organize it.
- Topics
 - Identify projects that fit for MLOps committee and their scenarios
 - Exposure to industry about these tools
 - Provide opportunity for committee members to cooperate across different projects
- Possible outputs :
 - White paper of MLOps for LFAI & Data
 - Best practice or Engineer Guide for MLOps

Plan for Deliverables Objective in this year

- A book named as 《MLOps Practice & Tools》 in Chinese
- This book will include :
 - what is MLOps ? What is it for ? And the guideline
 - OpenSource Tools (Feast, OpenMLDB, Adlik)
 - MLOps in real business (Netease, xiaomi, ICBC, etc)

Any Feedback?
