

# DataOps Committee

- [Overview](#)
- [Mail List](#)
- [Meetings](#)
- [References](#)

## Overview

DataOps is a set of tools and principles to support delivery of trusted, high-quality data. Below is an overview of the current discussion topics within the DataOps Committee. Further updates will follow as the committee work develops.

- Identify Projects and tools in DataOps Space and get the community exposed to how these DataOps tools work together and where to use in the pipeline (with pros and cons).
- Exposure to industrial approaches for dataset metadata management, governance, and automation of flow.
- Understand usage of DataOps tools and practices through industrial use cases (by domain). Identify gaps in the use case implementation and discuss solutions to bridge the gap.
- Exposure to tools and technologies that can help control the usage of data and securely access it across the enterprise in a cloud native platform.
- Provide an opportunity for committee members to perform research in the DataOps space.
- Educate the community about new developments in the DataOps space.

## Mail List

Please self subscribe to the mail list here at <https://lists.lfaiadata.foundation/g/dataops-committee>

Or email [dataops-committee@lists.lfaiadata.foundation](mailto:dataops-committee@lists.lfaiadata.foundation) for more information

## Committee Chairs

Name	Region	Organization	Email
Saishruthi Swaminathan	North America	IBM	<a href="mailto:saishruthi.tn@ibm.com">saishruthi.tn@ibm.com</a>

## Meetings

Insert meeting cadence, day of week, time, timezone
