

Egeria Webinar program

From time to time the Egeria Webinars are produced that provide education around on open metadata and governance., detailing why Egeria is so important when governing data from different sources. The program covers many topics including data strategy, adoption, contribution, integrations with different technologies as well as core education. Each webinar focuses on a specific audience or issue.

Previous webinar details can be found <https://odpi.github.io/egeria-docs/education/previous-webinars/>

Please use [Slack](#) to request a webinar you would like to hear or if you would like to volunteer to present a Webinar.

The following Webinar content is planned. Please see the [Calendar](#) for the confirmed information

Date	time	Title	Description	Presenter
8th November 2021	15:00 UTC	Open lineage	<p>This session will describe how to set up an Egeria production system where lineage can be visualised based on metadata from multiple sources. It will explain the Open Lineage standard and the Open Lineage services - two different things using the words "Open Lineage".</p> <p>This will include scenarios:</p> <ul style="list-style-type: none"> • metadata accessed using the OMRS repository connector proxy to a proprietary metadata repository • A scenario with all open source content and no proprietary code. • Lineage capture in various use cases • Consolidated view <p>Zoom Conference https://zoom.us/j/523629111</p>	ING Bank (TBA) and Mandy Chessell
6th December 2021	15:00 UTC	Kubernetes operator and Egeria	This session will cover how easy it is to run Egeria in Kubernetes and how the Egeria Kubernetes operator can be used to manage Egeria in a Kubernetes environment.	Nigel Jones
10th January 2022	15:00 UTC	What next after you have built a catalog. Part 1: the journey	Journey from manual cataloging, to using automated integration and templating. Metadata discovery and stewardship will be covered here also as well as metadata deduplication.	Mandy Chessell
7th February 2022	15:00 UTC	Time Travelling with Egeria	Every wanted to know what the state of your metadata was at some specific time in the past? This session will introduce the Crux open metadata repository that supports these historical metadata queries.	Chris Grote
7th March 2022	15:00 UTC	How to build a repository connector	Every wanted to build an OMRS repository connector? This session will take you though what the considerations are and you need to do. It will show how to create the simplest "Hello World" connector.	Chris Grote
4th April 2022	15:00 UTC	How to build an integration connector	This session covers how to extend Egeria's automated cataloguing to include metadata from a new technology. It describes how automated cataloguing works and the role of the integration connector. It covers the design of the integration connector using examples to illustrate the different approaches and their benefits and and challenges. It shows how to set up a project for a new connector, how to build and package it and finally it shows the new connector running in Egeria.	Mandy Chessell
9th May 2022	15:00 UTC	What next after you have built a catalog. Part 2: making it real	Making it real in your organisation. What are the infrastructure and culture changes that drive successful management of data? How can you use Egeria to design your governance organization and drive the desired cultural changes and behaviour.	Mandy Chessell

6th June 2022	15:00 UTC	What next after you have built a catalog. Part 3: strategic view	Becoming more mature with data governance, eventually enabling data citizenship. Data citizenship within an organization supports people who need access to data to be effective in their role. This data access needs to be embedded in the tools that they use and flexible enough to meet the changing challenges they face day to day. Since the data landscape is also changing, the tools that these people use need to be integrated with the data catalog.	Mandy Chessell
