

Egeria Webinar program

From time to time the Egeria Webinars are produced that provide education around on open metadata and governance., detailing why Egeria is so important when governing data from different sources. The program covers many topics including data strategy, adoption, contribution, integrations with different technologies as well as core education. Each webinar focuses on a specific audience or issue.

Previous webinar details can be found <https://odpi.github.io/egeria-docs/education/webinar-program/overview/>

Please see the [Community Guide](#) on ways to interact and collaborate with the Egeria community. You can use [slack](#) to request a webinar you would like to hear or if you would like to volunteer to present a Webinar.

The following Webinar content is planned. Please see the [Calendar](#) for the confirmed information

Date	time	Title	Description	Presenter
January 2022	n/a	n/a	There is no webinar this month. The team is working on creating a new set of monthly Dojo sessions . The first of these sessions will be on the 17th of January 2022 10AM - 17:00PM (UTC) and will be on How to setup and run Egeria in different environments . This will include the Kubernetes environment. Zoom Conference https://zoom.us/j/523629111	
7th February 2022	15:00 UTC	Using an integration connector	This session covers how to use Integration connectors to connect technologies into Egeria..	Mandy Chessell
7th March 2022	15:00 UTC	How to build an integration connector	This session covers how to extend Egeria's automated cataloguing to include metadata from a new technology. It describes how automated cataloguing works and the role of the integration connector . It covers the design of the integration connector using examples to illustrate the different approaches and their benefits and and challenges. It shows how to set up a project for a new connector, how to build and package it and finally it shows the new connector running in Egeria.	Mandy Chessell
4th April 2022	15:00 UTC	Using a repository connector	This session covers how to use Repository Connectors to connect technologies into Egeria; focussing on XTDB (formerly known as crux). Every wanted to know what the state of your metadata was at some specific time in the past? This session will introduce the XTDB open metadata repository that supports these historical metadata queries.	Chris Grote
9th May 2022	15:00 UTC	Kubernetes operator and Egeria	This session will cover how easy it is to run Egeria in Kubernetes and how the Egeria Kubernetes operator can be used to manage Egeria in a Kubernetes environment.	Nigel Jones
6th June 2022	15:00 UTC	How to build a repository connector	Every wanted to build an OMRS repository connector ? This session will take you though what the considerations are and you need to do. It will show how to create the simplest "Hello World" connector.	Chris Grote
11th July 2022	15:00 UTC	What next after you have built a catalog. Part 2: making it real	Making it real in your organisation. What are the infrastructure and culture changes that drive successful management of data? How can you use Egeria to design your governance organisation and drive the desired cultural changes and behaviour.	Mandy Chessell
8th August 2022	15:00 UTC	What next after you have built a catalog. Part 3: strategic view	Becoming more mature with data governance, eventually enabling data citizenship. Data citizenship within an organisation supports people who need access to data to be effective in their role. This data access needs to be embedded in the tools that they use and flexible enough to meet the changing challenges they face day to day. Since the data landscape is also changing, the tools that these people use need to be integrated with the data catalog.	Mandy Chessell
