Versioning Rule

Version = Major.Minor.Micro

It may be redistributed or packages with forth number in the form of A.B.C.D (Ubuntu/Debian) or A.B.C-D (Tizen).

The versioning rule is effective since 1.2.0 release.

Major: no policy is set, yet

Minor

- EVEN: stable release
    - Micro: long-term-support versions, detached from master branch.
- ODD: experimental/development release
    - Micro: marks progress in a Minor version release.

Here goes an example:

x.6.0 (stable) x.7.0 (x.8.0 rc1) .... x.7.1 (x.8.0 rc2) x.7.2 (x.8.0 rc3) ... x.7.y (x.8.0 rcy+1) == x.8.0 (stable) x 9.0 (x.10.0 rc1) ... (in master branch)

 |

 + ... hot fixes x.6.1 (in x.6.y branch)
