|  | <div>INCUBATION</div> | <p>Ludwig is a toolbox built on top of TensorFlow that allows to train and test deep learning models without the need to write code. All you need to provide is your data, a list of fields to use as inputs, and a list of fields to use as outputs, Ludwig will do the rest. Simple commands can be used to train models both locally and in a distributed way, and to use them to predict on new data.</p> <p>GitHub: <a href="https://github.com/ludwig-ai/ludwig/">https://github.com/ludwig-ai/ludwig/</a></p> |
