|  <h1>FEAST</h1> | <div>INCUBATION</div> | <p>Feast is an open source feature store for machine learning, developed as a collaboration between Gojek and Google. Feast aims to:</p> <ul style="list-style-type: none"><li>• Provide scalable and performant access to feature data for ML models during training or serving</li><li>• Provide a consistent view of features for both training and serving</li><li>• Enable re-use of features through discovery, documentation, and metadata tracking</li><li>• Ensures model performance by tracking, validating, and monitoring features in production</li></ul> |
|--------------------------------------------------------------------------------------------------|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
