Adoption

One of our main objectives as a Technical Steering Committee is to accelerate adoption of Egeria.

To do so, we plan to focus on the following areas:

- **Availability of functionality for common use cases**

  Including expanding our ecosystem of connectors and delivering entirely new functionality.

- **Knowledge-sharing on using Egeria for such common use cases**

  Including expanding documentation, hands-on guides and pre-packaged deployment options and samples.

- **Building relationships with related projects, vendors and potential adopters**

  Including sharing experiences of adopting Egeria and receiving input from the extended community on guiding our priorities.
