How do I determine the "impact" rating of a decision?

Here's an example you can use as a guide.

Decision characteristics	
• The decision will have a material impact on the customer experience OR • will significantly impact the roadmap OR • will adversely disrupt an internal business process.	**HIGH**
• The decision will involve a less than material change to customer experience OR • will impact the roadmap OR • will impact an existing internal business process	**MEDIUM**
• All other decisions	**LOW**

Outstanding decisions
