Cloud native minutes 2023-03-22

22 Mar 2023

Attendees

David Radley

Ljupcho Palashevski

Nigel Jones

Jürgen H.

Taylan

Agenda

- Discuss last week's presentation on microprofile
- Progress on work items

Discussion

Microprofile
 - Interesting
 - lots of similarities to spring
 - hard to see compelling reason to switch right now
 - lower priority, worth looking at as we streamline our code more generally

Standalone Server
 - David showed a standalone example of code to launch a single server
 - See https://github.com/odpi/egeria/pull/7513
 - Agreed to setup a new repository for our prototype work
 - can build a prototype toolkit. Dependencies will be on existing connectors and egeria framework code

Next meeting
 - All are on vacation at various times over next 3 weeks
 - Keep in touch on github discussions
 - Feel free to meet at same time other weeks - Nigel out for 2 weeks and will not host meeting
